Note: 1. Specifications are for device without connectors; Specifications may change without notice.
2. To add connectors, $I L$ is 0.3 dB higher, RL is 5 dB lower, $E R$ is 2 dB Lower, Connector key is aligned to slow axis.
3. Only guarantee 1 W continuous wave (CW) power thru testing for connectors added.
4. Devices for higher optical power or with other type fiber or consigned fiber are also available; Devices can only work in the core of Double Cladding (DC) Fiber, Cladding Power must be stripped before connecting the device.
